DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show the specific connection between the joint piece and the surface structure as described in the specification. The specification specifically details that the projections are received within the recesses formed on an underside of the surface structure; however, this arrangement is not shown in detail. A new figure, similar to figure 2c, is required in order to clarify and show the connection between the joint piece and the surface structure. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be

notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 14 recites projections located at the corners of a frame part and recesses, also in the surface structure of the frame part, that generally correspond in shape to the projections. Although new claim 14 clarifies the connection between the recesses defined between the platform structures, the claim still makes no positive connection between the projections and the recesses formed in the surface of the frame part. Currently, the structure remains as being non-operational in that there is nothing, supported by the specification, linking the joint piece and the surface structure. New claim 14, also details that there is a portion of the frame part that fits within the recess formed between adjacent platform structures; however, it is not clear how a portion of the frame part (which is a flat horizontal piece, as shown in Figure 3a) is positioned within the recess between the platform structures. From the figures, it does not appear that the frame part is able to fit within the recess between adjacent platform structures. If at all anything, the frame part is only capable of being positioned below the platform structures. It appears that only the projections are capable of being fit within the recesses. Clarification and correction is required.

Allowable Subject Matter

Claims 7-13 are allowed.

Claims 14-20 appear to contain allowable subject matter; however allowance is held in abeyance until receipt of claims written in conformance with 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
